Implement:

// Check Student Name

```
if(input.StudentName == "")
{
    alert "Please enter the Student Name.";
    cancel submit;
}
```

// Check ID Number

```
if(input.IDNumber == null)
{
    alert "Please enter the Student ID.";
    cancel submit;
}
```

// Check Department

```
if(input.department == "")
{
    alert "Please select the Department.";
}
```

```

        cancel submit;
    }

// Check Email
if(input.StudentEmail == "")
{
    alert "Please enter the Email Address.";
    cancel submit;
}

// Check Phone Number
if(input.StudentPhone == "")
{
    alert "Please enter the Mobile Number.";
    cancel submit;
}

// Phone Number Validation
if(input.StudentPhone.length() != 10)
{
    alert "Mobile Number must contain 10 digits.";
    cancel submit;
}

// Success Message
info "Student Details Submitted Successfully.";

```

Result:

Thus, a simple cloud software application was successfully developed using **Zoho Creator** and provided as a **Software as a Service (SaaS)** application. The application is accessible through the cloud and demonstrates the SaaS model successfully.
