

EXP NO 4: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

DATE:01.08.2026

AIM:

To Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into the zoho.com.

step 3: Select one application step.

step4: Enter application name as Car Booking Reservation System.

step 5: Created new application as Car Booking Reservation System.

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

The screenshot displays the Zoho Creator interface for a 'Car Booking Reservation System' application. On the left, the 'Basic Fields' panel lists various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, and Multi Select. The central workspace shows a form layout with the following fields: 'CustomerName' (with a user icon), 'PaymentStatus', 'PickupLocation', 'CustomerID' (with a '123' prefix), 'BookingDate', 'CarType', and 'NumberOfDays' (with a '123' prefix). On the right, the 'Field Properties' panel is open for the 'CustomerName' field. It includes sections for 'Field name' (set to 'CustomerName'), 'Field link name' (set to 'CustomerName'), 'Validation' (with a 'Mandatory' checkbox), 'Display Fields' (with checkboxes for 'Prefix', 'First Name', 'Last Name', and 'Suffix'), 'Data Privacy' (with a 'Contains personal data' checkbox), and 'Data Security'.

info "Car Booking Reservation Submitted Successfully.";
```

Result:

Thus, a simple cloud-based **Car Booking Reservation System** was successfully developed using **Zoho Creator**. The application enables users to reserve cars online, securely stores booking information in the cloud, and demonstrates the **Software as a Service (SaaS)** model.
